Summary — Enthusiastic Artificial Intelligence graduate with a strong command of Python programming and a deep interest in Artificial Intelligence, Data Analytics, and Machine Learning. With a blend of technical expertise creative problem solving abilities, and a commitment to continuous learning, I am eager to contribute to innovative projects as a Python Developer, AI Research Intern, or Data Analyst. Skilled in scalable AI development solutions through effective team collaboration.

Skills

ML & AI: Machine Learning, Deep learning, Scikit-learn, OpenCv, Tensorflow
Data Analysis: Pandas, Matplotlib, NumPy
Data Entry: MS Excel
PowerBi:
Languages: Python

Experience

CodeAlpha
Machine Learning Intern (Remote)

- Performed data preprocessing, feature selection, and data normalization to enhance model accuracy and efficiency. Utilized libraries such as Pandas, NumPy, Scikit-learn, and Matplotlib for data analysis, model building, and visualization.
- Optimized end-to-end ML pipeline processes including data acquisition, preprocessing, and exploratory analysis, reducing processing time while enhancing model performance on enterprise-scale datasets.
- Collaborated on additional machine learning tasks and gained hands on experience in model training, testing and performance optimization.

MeriSkill
Data Analyst (Remote)

- Collected cleaned and analyzed large datasets to extract meaningful insights for business decision making, performed data preprocessing , transformation using python (pandas , numpy).
- Developed interactive dashboards and visualizations in powerBi to present trends and conducted exploratory data analysis (EDA) to identify patterns , correlations.

Education

Quaid-e-Awam University Nawabshah **Nov 2021 – July 2025**
Bachelor of Science in Artificial Intelligence

Certifications
- Google Prompting AI Essential – Coursera
- Microsoft Excel – Coursera

Projects

Real-Time Emotion Recognition from facial Expression Using Deep Learning
- Developed a emotion recognition system using deep learning techniques and utilized various neural network architectures to enhance detection accuracy, built a live emotion detection model using webcam input achieving 80% accuracy.
- Tools : Python , Tensorflow , OpenCv

Credit Scoring Model Using Machine Learning
- Developed a machine learning model that assess credit risk based on the historical data.
- Tools : Python , Scikit learn , Pandas
